# Inspired by the sea

V1.0

The Minorca version 1 is out! Minorca unfolds from ExtraLight to Bold in generally slender proportions, drawing inspiration from the atypical engraved capitals spotted along the Mahon port -

the hotspot of the Minorcan island. The M, N, A, V, & W letters are keeping it real with that engraved charm and imperfections.

We've added a specific axis of variation to this skeletal framework, just for the serifs - we call it the 'Wave' axis. Why? Because we wanted to give this font a nautical makeover, like it's riding the waves.

Since it's also variable, you get to play with coordinates from a subtle wiggle to a more dramatically wavy style for various applications. In body text, the overall style is warm and cozy with the default version. Need some extra oomph for your headings? The Wavy version is ready to surprise. But, no matter the choice, all styles are fair game!

P.S.: A whole bunch of small capitals and some graphical arrows & marine elements are now available!
